SUMMARY

Detail-oriented Information Technology undergraduate and Full-stack Web Developer with experience in building scalable web applications. Proficient in reading and comprehending technical English instructions. Passionate about Artificial Intelligence, currently co-authoring research on AI architectures. Eager to leverage skills in code testing, prompt engineering, and LLM evaluation for AI training projects.

EDUCATION

Universitas Bina Sarana Informatika (BSI) <i>Bachelor's Degree in Information Technology (S1)</i> Currently in 6th Semester.	Indonesia <i>Sept. 2023 – Present</i>
SMK Mekanik Cibinong <i>High School Diploma</i>	Cibinong, Indonesia <i>July 2020 – May 2023</i>

EXPERIENCE

Freelance Web Developer <i>Remote</i> - Collaborated within a development team to build a comprehensive e-commerce platform for Vespa. - Managed project requirements, handled direct client communication, and ensured contract fulfillment. - Utilized modern web development frameworks to deliver scalable and efficient solutions.	Sept. 2025 – Dec. 2025 <i>Indonesia</i>
Web & Content Intern (PKL) <i>Agronesia</i> - Designed and developed product homepages to improve the company's online catalog and user experience. - Created engaging multimedia content to support marketing and promotional campaigns. - Managed and recorded inventory stock data to ensure accurate operational tracking.	2022 (3 Months) <i>Indonesia</i>

PROJECTS & RESEARCH

Neuro-Symbolic AI Trading Architecture <i>Research Co-Author</i> - Co-authoring an academic research article detailing a novel AI architecture for trading systems. - Handled data structuring, JSON processing, and documentation to support the research methodology.	Jan. 2026 – Present
Dermascope (Academic Platform) <i>Platform Product Lead</i> - Built an end-to-end academic productivity platform featuring citation drafting, structured document validation, and similarity detection. - Developed a modular monolith codebase and a robust AI Gateway with graceful fallback strategies.	2026
Agentic Core <i>AI Workflow Developer</i> - Developed a highly structured starter workflow and execution contract package for AI coding agents. - Implemented strict engineering guardrails, evidence-based review checklists, and automated validation rules to ensure consistent AI outputs across sessions.	2026
Airdrop Hunter <i>AI & Automation Engineer</i> - Created an automated Telegram monitor utilizing LLMs to filter public channel feeds and extract structured data tasks. - Delivered a clean, high-performance daily checklist with automated deadline and priority score calculations.	2026
Aura SQM <i>Systems Engineer</i> - Engineered a dynamic network traffic control daemon in Go tailored specifically for OpenWrt embedded devices. - Interacted directly with Linux kernel traffic control (tc) to optimize Smart Queue Management and reduce latency.	2026

TECHNICAL SKILLS

Core Competencies: Prompt Engineering, Code Testing, AI Model Evaluation (LLM), Agentic AI Workflows, Neuro-Symbolic AI, Full-stack Web Development
Languages & Web Tech: JavaScript, TypeScript, Go (Golang), PHP, HTML/CSS, English (Pre-Intermediate), Indonesian (Native)
Frameworks & Tools: Vue 3, Next.js, NestJS, Bun, Git, Docker, OpenWrt, VS Code, Google Antigravity
